PROFESSIONAL SUMMARY

Product Designer with 10+ years of experience designing enterprise software, SaaS platforms, and AI-powered products. Experienced across the full product design lifecycle—from user research and workflows to high-fidelity interfaces, design systems, and developer handoff. Passionate about simplifying complex business processes into intuitive experiences through close collaboration with product managers, engineers, and stakeholders.

WORK EXPERIENCE

UI/UX Designer — Nov 2021 - Jun 2026

[Actimai Philippines, Inc.](#) — Pasig City PH

- **Designed end-to-end UX/UI for *DocThread AI***, an AI document processing platform spanning three portals (operations, client, admin) — owning UX from discovery through developer handoff in partnership with R&D and product engineers.
- **Built and maintained the Figma design system and component library**, enabling rapid screen production and visual consistency across all three portals.
- **Led internal design sessions** on design systems and their role in the development process, showing colleagues how Figma works beyond wireframing as a full design tool alongside **Adobe**, **Canva** and **Figma**.
- **Initiated design reviews** with client engineering, product engineering, and the product owner, presenting redesign rationale backed by usability findings and user feedback.

User Interface Web Developer — Nov 2019 - Apr 2021

[IBM Global Business Services, Inc.](#) — Quezon City PH

- **Designed accessible learning portals for IBM employees** in partnership with instructional designers, translating pedagogical requirements into clear, usable interfaces.
- **Implemented those portals with the R&D team** across WordPress, Moodle, Dojo, and React.
- **Created custom WordPress (Gutenberg) blocks** that let non-technical content editors build and update pages independently, reducing developer bottlenecks and speeding up content turnaround.

Web Developer / Wordpress Designer — Feb 2019 - Nov 2019

[AffinityX Inc. \(formerly Affinity Express Philippines, Inc.\)](#) — Quezon City PH

- **Built custom WordPress sites** with Beaver Builder for clients across the US and Europe, including white-label projects delivered for GoDaddy.
- **Delivered design enhancements on a ticket basis** through Jira — image processing and editing, logo design, and page-level fixes.
- **Built WooCommerce storefronts and booking pages** for e-commerce and service clients, adding webhook integrations to connect checkout and booking flows with external systems.

UI/UX Designer — Oct 2018 - Jan 2019

[Hello Media Inc.](#) — Quezon City PH

- **Designed the mobile app UI for iOS and Android** — event discovery, attendee matching, and partner promos — handing off specs, assets, and guidelines to an offshore engineering team.
- **Streamlined social media campaign execution**, enabling the content team to produce 3-5 posts daily across Philippine entertainment events.

- **Supported live event activations** — a campus hip-hop competition and a university partnership event — with promotional collateral and on-site photo/video assistance.

UI/UX Designer — Mar 2017 - Sep 2017

Mobile Group Inc. — Makati City PH

- **Redesigned end-to-end cinema booking flows** (search → seat selection → payment) for major Philippine chains including SM Cinema, Robinsons Movieworld, Shang Cineplex, and Fishermall Box Office, running stakeholder interviews with each client to identify friction points before prototyping and testing solutions.
- **Produced concept work for two adjacent products** — an events discovery platform positioned against Eventbrite, and a tablet-based parking management app covering slot monitoring, payment, and camera feed review.

Jr. Graphic Designer — Apr 2016 - Aug 2016

TalentSource Inc. — Pasig City PH

- **Created marketing collateral and social content** for PhilJobNet career caravans — standees, leaflets, stickers, job listing graphics, and video assets — supporting DOLE partnership activations.
- **Designed the company's corporate identity system:** logo, business cards, email and document templates, and corporate badge..

Web Designer — Dec 2014 - Mar 2016

Medilink Network Inc. — Makati City PH

- **Translated wireframes into high-fidelity prototypes** for Maxicare HMO portals (claims processing, member enrollment, provider lookup), implementing the front end in CSS, Bootstrap, and JavaScript against engineering-built backends.
- **Designed an internal Call Management Suite** for contact center operations, covering call recording, quality evaluation, and MIS reporting, working from requirements set by the UX team lead.
- **Designed and maintained a knowledge base portal** that made the company's core product understandable to non-technical staff and clients.

EDUCATION

Bachelor of Science in Information Technology — Jun 2009 - May 2013

Polytechnic University of the Philippines - Manila Campus

TRAININGS & CERTIFICATIONS

- **Digital Skills: User Experience** — Accenture
- **Accessibility Advocate** — IBM
- **Enterprise Design Thinking Co-Creator** — IBM
- **Master Digital Product Design: UX Research & UI Design** — Udemy
- **Motion Design with Figma** — Udemy
- **Become a UX Designer from Scratch (IxDF)** — Become a UX Designer from Scratch
- **Foundations of Project Management** — Google
- **Prompt Engineering for Everyone** — CognitiveClass
